Glossary

Major mine: a mine with an operating coal or mineral mine that has a permit issued under the *Mines Act*.

Major Mine Application: an application to the Chief Permitting Officer to authorize the construction and operation of a coal or mineral mine through a permit issued under the *Mines Act*.

Notice of Departure: departure from approval

Business BCeID: a secure login credential issued by the Province of British Columbia that allows authorized representatives of a business or organization to access online government services on behalf of that entity.

Commodity: the primary extracted material that is valuable and can be bought and sold in the market, such as gold, copper, or iron ore. These are often raw materials that are unprocessed or minimally processed before being traded.

“Consequence classification” refers to the categorization of a **Tailings Storage Facility (TSF)** or dam based on the **potential impact of its failure**.

“Independent tailings review board” is a panel of external experts established by a mine to provide **independent, third-party oversight** of the design, construction, operation, and closure of Tailings Storage Facilities

“Manager” means the person appointed under section 21 to be responsible for the management and operation of a mine (Mines Act)

Permit-Required Report: A report that a mine must submit because it is specifically required by the mine’s operating permit. These reports are unique to each mine and are **not listed in the general Health, Safety and Reclamation Code (HSRC)**, but are still legally required to ensure the mine meets its environmental and safety obligations.

Chapter 1: Introduction

This guide provides an overview of how to use the MineSpace portal for managing mining-related applications, submitting reports, and viewing inspection histories.

What is MineSpace?

MineSpace is the government of British Columbia's industry portal for mining oversight. It is actively maintained by Mines Digital Services (MDS), within Ministry of Mining and Critical Minerals (MCM).

What can I find on MineSpace?

MineSpace allows you to access general information about your mine, including:

- Mine manager contact details the Ministry has on file for your mine.
- Important Ministry contacts.
- Inspection dates for your mine.
- Reference of inspections that resulted in orders being issued for your mine.
- Status of your *Mines Act* permit application.
- Permits issued by MCM, including amendment histories, variances applied for, and explosives storage and use permits.
- History of reports submitted to MCM.
- Bonds for permits for your mine that are held by MCM.
- Access to additional mines or request to be removed from mines on your MineSpace profile.

MineSpace also allows users to submit and manage permits, applications, and reports, including:

- Permits issued by MCM, including new permits, amendments, and explosives storage and use permits.
- Reportable incidents that occur on your mine site.
- Permit-required reports, including those required under the *Health, Safety and Reclamation Code for Mines in British Columbia* (HSRC) and for unique conditions related to your permit.
- Applications for variance to the HSRC relating to your mine operations.
- Information relating to Tailings Storage Facilities on your mine.

Additionally, if you are a **major operating mine** in British Columbia, you can also do the following:

- Submit a departure from approval assessment (Notice of Departure) for record or ministry review.
- Submit new applications for major mine operations.
- Submit amendments to major mine permits that have already been issued.
- Submit a new or amendment to existing *Environmental Management Act* authorizations including air emissions, effluent, or refuse discharge authorizations.
- Create a digital wallet connection to prove your company holds a *Mines Act* permit.

Who can access MineSpace?

Applicants and holders of a *Mines Act* permit in the province of British Columbia can apply for access to MineSpace.

Operational and administrative support, contractors, and mining specialists can also have access to specific mines with explicit permission from the permit holder.

Access is not automatically granted to permit holders and must be requested by contacting MDS@gov.bc.ca. Refer to [Chapter 2: Getting Started](#) for details on how to apply for access.

Chapter 2: Getting Started

To access MineSpace, you will need a Business BCeID. Follow these steps to register for a BCeID and log in to MineSpace.

Apply for a Business BCeID

To apply for a Business BCeID, follow these steps:

1. Go to the Business BCeID registration page under BCWS Vendor Portal ([BCeID - Business BCeID: Getting Started](#))
2. Click "Register for a Business BCeID" and start the registration process.
3. Follow the five-step registration process outlined on the webpage.
4. Once registered, you will receive notification from BCeID with your Business BCeID particulars.

Managing Your BCeID Account

Refer to the [Business BCeID Account and Profile Management Guide \(PDF\)](#) for detailed instructions. Key tasks include:

- Creating and managing employee accounts.
- Assigning roles (e.g., Business Profile Manager).
- Updating business information.
- Activating subscription codes for services.
- **NOTE:** If you have multiple employees who need to use MineSpace, add them to your Business BCeID account.

Help and Support for BCeID Accounts

Contact Service BC Help Desk for help and support with BCeID account. They can be reached via their [online contact form](#), or by phone:

- Toll-free: **1-888-356-2741**.
- Lower Mainland or outside Canada: **604-660-2355**.

Request Access to MineSpace

Before you can start viewing and working in MineSpace you need to be assigned access to the mines you are authorized to use. This assignment is managed by the Mines Digital Services team for security purposes. Follow these steps to get access:

1. To request access to MineSpace, please [fill out and submit this online form](#).

Important information required to complete the form includes:

- First and Last Name of the person the access is requested for
 - Email address that matches the person's BCeID registered account
 - BCeID username of the individual who requires access
 - The role or position of the person who requires access
 - Mine number and/or permit number of the mine that access is required (mine number is available on the mine's permit)
 - Contact details of a Ministry representative that can verify you as a mine manager or permittee of the mine(s) that access has been requested OR
 - Written authorization from the permittee of the mine(s) that access has been requested for.
 - Submission of the form will automatically notify the Mines Digital Services team that you are requesting access to MineSpace.
2. Attempt to login to [MineSpace using your BCeID](#).
 - **NOTE:** You will receive an access denied message. This is expected but required for administration to find your credentials to be able to set up your account.
 3. Once you have completed the above steps, wait for a confirmation email from MDS@gov.bc.ca before attempting to log into your account again.
 4. Once the MDS team verifies your request for authorization and references, they will grant access and send a confirmation email to the email address provided on the access request form.
 5. If you have not received confirmation or further information requests within 10 business days, contact MDS@gov.bc.ca to follow up.

Log Into MineSpace

Once your MineSpace access has been confirmed the MDS, go to <https://minespace.gov.bc.ca/> to log in to MineSpace with your Business BCeID.

Using the My Mines page

Once you have been provided access to view mines in MineSpace, you can navigate the MineSpace portal to manage your mining-related applications and see information that the provincial government has about your mine.

Managing your list of viewable mines in MineSpace

1. Once you are logged into MineSpace, on the My Mines page, select the Manage My Mines, located on the top right corner of the page.
2. Under the *Manage My Mines* button you can either:
 - **Request access to a mine** that is not currently showing on your list; or
 - **Request to remove a mine** from your profile.

Each option will direct you to an online form to complete your request.

Figure 1. View of My Mines page in MineSpace. See the Manage My Mines menu on the top right corner of the page to request changes to your list of viewable mines.

3. When filling out a **Request access to a mine** that is not currently showing on your list:
 - Ensure you BCeID username and email is the same provided as your existing account
 - Provide the mine number of the mine you require. This number can be found on the *Mines Act* permit.

- Provide written authorization from the mine's owner or administrator (be sure to include their name and contact details in the letter).
4. When filling out a ***Request to Remove a Mine*** that you no longer require access to:
- Ensure you BCeID username and email is the same provided as your existing account
 - Provide the mine number of the mine you require to be removed

Viewing Notifications for your Mine

On the My Mines page, you can access notifications by clicking on the **bell icon**, located on the top right of your page.

If there is a **red indicator**, this indicates that there are unread notifications relating to one or more of your mines.

Accessing In-Application Help

You can access in-application guidance by selecting the question mark (?) symbol on the top right corner of any page in MineSpace.

Figure 2. View of the features available on the My Mines page in MineSpace.

Finding Mine Information on MineSpace

Click on the name of the mine that you want to view or action an activity. If your mine is not on the list, but you have been granted access, navigate to the next page of mines by clicking the page button or changing the number of mine records you can see on the page with the record count option.

The following table outlines each page of the website along with a brief description of the content and purpose of that page.

Page	Summary
Overview	The main landing page for your mine, displaying key operational details and contact information.
Applications	Check the status of your Notice of Work applications. For mines with major operating permits, you can also apply for new or amended <i>Mines Act</i> and <i>Environmental Management Act</i> authorizations.
Permits	View your <i>Mines Act</i> and Explosives Storage and Use permits. For major operating mines, you can also start connecting permits to digital wallets.
Inspections	Access your mine's inspection history and view the status of orders that have been issued.
Reports	Submit Code and Permit required reports under permits and codes, and review your mine's report submission history.
Incidents	Submit written notice of reportable incidents and final incident reports that occur at your mine, and view history of reportable incidents.
Notice of Departure	For mines with major operating permits, submit notice of departure for review and receive decision on your notice of departure assessment. View history of notice of departure records that were submitted through MineSpace.
Variances	Apply for and receive decisions on requests for variance to the <i>Health, Safety and Reclamation Code</i> (HSRC).
Bonds	View the financial bond history associated with your mine.
Tailings & Dams	Manage and update information about your tailings storage facilities and dams, including updating your engineer of record and qualified persons for your facility(s).

Chapter 3: Navigating the Mine Overview page

Each mine in MineSpace has an overview page that outlines key information relating to that mine site.

Reviewing your Mine Information

You can review your mine's information available on MineSpace using the **Mine Overview** page.

1. Navigate to your mine's **Mine Overview** page by clicking on the name of the mine on the **My Mines** page.
2. Once on the Mine Overview page you can view key **Mine Information** about your mine profile including:
 - The operating region of your mine.
 - The location of the mine.
 - The primary extraction material (commodity) of the mine.
 - The disturbance method of the mining operation.
 - List of active *Mines Act* permits for the mine (a mine may have more than one active permit).
3. If details under the Mine Information section are incorrect, contact the MCM Ministry office via email, located under Ministry Contacts on the Mine Overview page. **NOTE:** Please ensure you include the mine name and mine number, and provide the updated information in the email.

Updating your Mine's Work Information: Notice to Start or Stop Work

Keeping your mine's active work dates up to date helps emergency services respond quickly to the right locations, saving time, resources, and lives.

Under the [Health, Safety and Reclamation Code for Mines in British Columbia \(HSRC\)](#), mine operators are required to submit a **Notice to Start Work** under Section 6.2.1 and a **Notice to Stop Work** under Section 6.2.2. These notices ensure the provincial government is informed of operational changes that may impact health, safety, or the environment.

To streamline compliance, mine operators can manage and maintain these records through MineSpace as follows:

1. Navigate to your mine's **Overview** page by clicking on the name of the mine on the My Mines page.

2. Scroll to the **Work Information** box on the **Overview** page
3. Click on the pencil icon in the top right corner to open the editor and make updates to your mine's records
4. Click inside the **Work Start Date** box to open a date selector.
5. Click on the date your mine starts work, or you can click on **Today** to set the date to today's date.
6. Click on the **Work Stop Date** box to open a date selector and select the date your expected or actual Work Stop Date.
7. **Optional:** You can add comments to this feature if you choose to do so. Any comments will be visible to Ministry staff as well as anybody who has permission to view the mine in MineSpace.
8. Click **Update Mine Work Information** to save changes or click 'Cancel' to exit without saving changes
9. Once you have saved changes, your registered Business BCeID and the date and time of the change will be recorded and displayed, and an automated email will be sent to the Ministry of Mining and Critical Minerals' Regional Operations Team or Major Mines Office to notify of the update.
10. This action meets requirements to notify government of intent to start work or stop work, as defined in the [Health, Safety and Reclamation Code for Mines in British Columbia](#).

Work Information

Keep your start and stop work dates current. Sections 6.1.2 and 6.2.2 of the Health, Safety & Reclamation Code apply to any person doing any work (mining activity) at, on, or about the mine site.

Work Status: Working

Comments (optional)

Updated the mine's Stop Work Date.

Updated By: test_minespace@bceid Updated Date: May 2, 2025 11:57 AM

Figure 3: The edit view of the Work Information section of a mine record. Click on the date fields to open a date selector to choose the correct dates for the mine operation dates.

Updating your mine's worker information

In an emergency, knowing exactly who is on site can mean the difference between a coordinated rescue and chaos—accurate worker counts are critical to protecting lives. To that end, please ensure your mine's worker information is accurate and up-to-date.

To manage your mine's worker information, follow the following steps:

1. Navigate to your mine's **Overview Page** by clicking on the name of the mine on the My Mines page.
2. On your mine's Overview Page, scroll to the **Worker Information** box.
3. Click on the pencil icon on the top right of the information box to add or update your worker information.
4. Click inside the text box to enter the number of mine employees and number of contractors working at the mine site. **NOTE:** the numbers can be approximate.
5. Click **Update Mine Worker Information** to save changes or click **Cancel** to exit without saving changes.

The screenshot shows the MineSpace interface. On the left is a sidebar with navigation links: Overview, Applications, Permits, Inspections, Reports, Incidents, Notices of Departure, Variances, Bonds, and Tailings & Dams. The main content area is titled 'Dark Crystal' (Mine number: 2000105) and shows 'Commodity: Beryl', 'Disturbance: Surface', and 'Active Permits: M-ZYXWVUT'. The 'Work Information' section includes a note about keeping start and stop dates current, and fields for 'Work Start Date' (May 01 2024), 'Work Stop Date' (Jun 26 2025), and 'Work Status' (Working). Below this is the 'Worker Information' section, which is circled in red. It contains two input fields: 'Number of Mine Employees' with the value '13' and 'Number of Contractors' with the value '4'. At the bottom of this section are 'Cancel' and 'Update Mine Worker Information' buttons. On the right side of the page is a 'Ministry Contacts' panel listing the Major Mines Office, Chief Inspector of Mines (Hermanus Henning), Chief Permitting Officer (Lowell Constable), and Health and Safety Inspector (Megan Frederick), each with their contact information and email links.

Figure 4: Updatable field information for the number of workers is located on the mine Overview page.

Viewing and managing mine Contacts

You can find key Ministry of Mining and Critical Minerals contact details on the right side of the **Overview Page**.

To send an email to each contact, click on the underlined email link to trigger the ability to send an email.

The **Mine Manager** on file for the mine is also viewable under **Contacts** at the bottom of the Overview Page.

If information regarding your mine manager is incorrect, contact the Ministry of Mines and Critical Minerals office via email, located under Ministry Contacts on the Mine Overview page.

Ensure you include the mine name and mine number, and provide the updated information in the email. **NOTE:** Mine managers are a regulated position under the *Mines Act*. Ensuring the Ministry has up-to-date and accurate information is critical in maintaining your mine's regulatory obligations. For more information on requirements to maintain mine manager information, view the [Mines Act](#)

Figure 5: Ministry and mine contacts are available to view on the Overview page of your mine record.

Additional features

To explore the other features available on MineSpace, navigate to your mine's **Overview** page by clicking on the name of the mine on the **My Mines** page.

On the left panel of the Overview page, there are quick links to additional features in MineSpace. Click on the name of the feature you want to navigate to from this Overview page. Click on Overview to return to your mine's overview page at any time.

If your mine is flagged as a major mine in MineSpace, you may have access to additional features on the quick links list. These include:

- Submitting a departure from approval (notice of departure) in MineSpace.
- Submitting an application for a new or amendment to an existing *Mines Act* permit.
- Submitting an application for a new or amendment to an existing *Environmental Management Act* authorization.

Chapter 4: Notice of Work Applications

Notice of Work Applications in MineSpace

A **Notice of Work Application (NoW)** is required to obtain a *Mines Act* permit for exploring and developing mineral, coal, placer, quarry, and aggregate resources in the province. This application applies to both new permits and amendments. For more details or to apply, visit [FrontCounter BC](#) or the provincial government's [mine exploration and discovery](#) webpage.

Mine operators can view the real-time status of their Notice of Work applications directly within the MineSpace platform.

Submitting Notice of Work (NoW) Applications through virtual FrontCounter BC

Notice of Work applications shown in MineSpace are submitted through FrontCounter BC and cannot be edited in MineSpace. For assistance in updating your application, please contact your regional office.

For more information, visit FrontCounter BC's [Natural Resource Online Services](#) and search for "Notice of Work application" under Natural Resource Applications.

Tracking Notice of Work Applications in MineSpace

To track your Notice of Works application in MineSpace, follow these steps:

1. From your mine's **Overview** page, click **Applications** on the left-side column.
2. If your mine is identified as a major mine, select the **Notice of Work Applications** tab on the Applications page.
3. If your mine is not a major mine, you will see the Notice of Work Applications tab on the Applications page automatically.
4. Locate your Notice of Work application. The **current status** will be displayed in the **Status** column.
5. To monitor progress, click the **View** button on the right-hand side of the page to view more detailed status updates and to track the progress of your application.

What Does the Notice of Work Status mean?

There are two different status updates available for your Notice of Work application.

Overall Status (Notice of Work Application page):

- **Received:** Application has been received through virtual FrountCounter BC (vFCBC) and is awaiting acceptance.
- **Pending verification:** Application has been accepted and is pending approval into the Ministry of Mines and Critical Minerals' application management system.
- **Referred:** Application has been sent for referral to other government agencies for review.
- **Client delayed:** Application is awaiting information from the applicant.
- **Government (Govt.) action required:** Application is awaiting information from other ministries.
- **Referral complete:** Review and comments have been received by the permitting inspector for review.
- **No permit required:** The application does not require issuance of a permit to start work.
- **Approved:** The application has been reviewed and a permit for the activity has been issued.
- **Rejected:** The application has been rejected and activities outlined in the application are not approved.
- **Withdrawn:** The application has been withdrawn and will not be reviewed for decision.

Notice of Work Detailed Status (Overview view):

- **Technical review:** Technical information regarding the application is being reviewed by the permitting inspector. No decision has been made.
- **Referral to other agencies:** Application has been sent for referral to other government agencies other for review. No decision has been made.
- **First Nations consultation:** Application has been sent for to First Nations for review. No decision has been made.
- **Open for public comment:** Application is available for public to review and comment. The public posting of the application can be seen here: [Regional mines public engagement portal](#).
- **Permit considerations in review:** Information regarding the application is being reviewed by the permitting inspector. No decision has been made.

Why do some application stages show as “N/A”?

Sometimes, if a permit was approved outside the Core system, the steps showing how the application was processed might say “N/A” (not available). This is expected behaviour and nothing to be concerned about. If you have questions or need more details, please contact your regional operations team. You can find their contact information on the **Overview** page of your mine.

How long until a decision has been reached on my Notice of Work Application?

The time it takes to reach a decision on a Notice of Work application can vary based on the type and complexity of the proposed activities. For **mineral exploration and coal exploration applications**, review expectations are informed by the **application tier** assigned to your submission. The tier reflects the level of review required and is visible in **MineSpace on the Applications page** for your Notice of Work.

Other application types—such as **sand and gravel, quarry, placer, and producing mine applications**—do not follow fixed or tier based timelines. Processing times for these applications can vary depending on site specific factors, consultation requirements, and whether additional information is needed during review.

Chapter 4: Major Mines Applications

Mining proponents can prepare and submit a **Major Mine Project Application** or an **Amendment to an Existing Project** through MineSpace.

A Major Mine Application is an application to the Chief Permitting Officer to authorize the construction and operation of a coal or mineral mine through a permit issued under the *Mines Act* or *Environmental Management Act*, or to amend existing operations related to an operating mine of the same definition.

What you can and cannot submit for major mines in MineSpace

You **can** submit:

1. Applications for **new major operations**, including:
 - *Mines Act* permit.
 - *Environmental Management Act* authorizations for air emissions, effluent and refuse discharge.
2. **Amendments to major operations**, including:
 - *Mines Act* permit.
 - *Environmental Management Act* authorizations for air emissions, effluent and refuse discharge.

You **cannot** submit:

1. **Exploration outside the permitted mine area** (not expanding production). If you are proposing exploration work ([HSRC 9.1.1](#)) outside of the permit mine area of an operating production mineral or coal mine that does not consist of an expansion to the production mining area, please submit a Notice of Work application through [FrontCounter BC](#) to amend your MX or CX permit.
2. **Induced polarization surveys or exploration drilling within the permitted mine area**. If you are proposing induced polarization surveys or exploration drilling within the permit mine area of an operating production mineral or coal mine ([HSRC 10.1.2](#)), please submit a [Notification of Deemed Authorization](#) application through [FrontCounter BC](#).

For all other applications, contact the appropriate Ministry for further information. If you are unsure how to proceed, please email the Major Mines Office at permrecl@gov.bc.ca

How to create a new major mine project application

Using the MineSpace platform, you can submit a major mine project application for new major operations or amendments, as well as *Environmental Management Act* (EMA) permits or approval for air emissions, effluent, or refuse discharge.

For detailed instructions and training videos on how to submit a major mine application, please refer to the [MineSpace Online Training Resource](#) to submit your Project Description.

1. From your mine's Overview page, click the **Applications** page on the left-side panel. If your mine is identified as a major mine, ensure you are on the **Major Mine Applications** tab on the Applications page. **NOTE:** If you believe your mine is classified as a major mine but Major Projects information does not show up, contact the Major Mines Office at permrecl@gov.bc.ca and let them know.
2. Click on **Create New Project** to start the major project application process.
3. Confirm you are on the right path by checking the authorization(s) relevant to your application:
 - A. Submitting a **major mine application** to the Chief Permitting Officer for new major operations or amendments requiring ministry decision.
 - B. Submitting an *Environmental Management Act* (EMA) permit or approval for air emissions, effluent, or refuse discharge.
4. At the bottom of the page, choose:
 - A. **Cancel** to exit, or
 - B. **Create Project Description** to proceed with your submission.
5. Complete the **Project Title** and **Project Overview** (mandatory).

The screenshot shows the MineSpace web application interface. At the top, there's a dark blue header with the British Columbia logo, 'MineSpace' text, and user information like 'My Mines' and '@gov.bc.ca'. Below the header, the left sidebar shows a navigation menu with 'Applications' highlighted. The main content area is titled 'Applications' and has two tabs: 'Major Mine Applications' (active) and 'Notice of Work Applications'. Under 'Major Mine Applications', there's a sub-header and a paragraph explaining the application process. A red circle highlights a blue button labeled 'Create New Project'. Below this, there's a table with columns: Project Title, Project #, Contact, Last Updated, and Updated By. The table contains three rows of data.

Project Title	Project #	Contact	Last Updated	Updated By
Expansion of mine boundary - east	N/A	N/A	Jan 09 2026	test_minespace@bceid
Expansion and road upgrade	ABC-123	John Doe	Jan 09 2026	test_minespace@bceid
Extension to water treatment plant A	N/A	N/A	Jan 09 2026	test_minespace@bceid

Figure 6 Major mine applications are created through the Applications page.

Link related projects

Use the **Related Projects** page to associate your new major mine project application with existing projects at the same mine.

1. Click the drop-down menu to select any of the project applications already in progress associated with your user profile.
2. Click the **Add** button to link the application to the project application you are submitting.
3. To remove a linked project application, click the **Action** drop-down menu on the right, select **Remove Linked Project**, and then select **Delete** in the pop-up window to delete the project link.

Purpose and Authorization

The **Purpose** and **Authorizations** pages allow you to select the permits and authorizations relevant to your project.

1. To select a **Mines Act Permit**, select the appropriate option (new or amendment) and complete the required fields.
2. For **Environmental Management Act (EMA)** authorizations (e.g., air emissions, effluent, refuse discharge), provide detailed information, select the correct authorization type, and upload required documents. Use the **YYYY MM DD + descriptive title** naming convention for all uploaded files to support efficient review.
3. Indicate other required permits (e.g., Water Sustainability Act, Forestry Act) relevant to your project. **NOTE:** Applications for these permits cannot be submitted via MineSpace.
4. **NOTE:** Carefully review your selections before submitting, as this section cannot be edited after submission.

Project Contacts and Applicant Information

Enter contact details for the project, applicant, and any representing agents on the Project Contacts and Applicant Information pages.

1. Ensure all mandatory fields are completed accurately.
2. If acting as an agent, indicate your role and provide relevant contact information.

Location, Access and Land Use

The **Location, Access and Land Use** page allows you to enter land ownership details for your project.

1. Enter all required legal land ownership details, access coordinates, and land identifiers (e.g., PID, PIN, Crown File No.).
2. Include mine lease numbers and describe the facility and proposed activities.
3. When you have completed your submissions, click **Save & Continue** to proceed to the **Project Dates and Document Upload** page.

Project Dates and Document Upload

The **Project Dates** and **Document Upload** pages allow you to enter estimated milestone dates (e.g., permit submission, anticipated start date) and upload supporting documentation for your project.

1. Enter the estimated dates for which you anticipate your project will reach particular milestones. These dates are strictly for guidance and planning purposes and do not reflect actual delivery dates. Milestones include:
 - When you anticipate submitting the draft **Information Requirements Table** (IRT).
 - When you anticipate submitting the **permit application**.
 - When you hope to receive your new permit or amendment to your **permit or environmental authorization**.
 - When you hope to **start work** on this project.
2. Upload supporting documents and spatial data using the correct file format and naming conventions.
3. Review uploaded files and ensure completeness before submission.

Application Summary and Declaration

The **Application Summary** page allows you to review and edit the permits you have applied for under the Mines Act, Environmental Management Act, Water Sustainability Act and any other legislation, prior to submitting them.

1. Review all application components before submission.
2. Agree to the legal declarations confirming the accuracy of your submission.
3. Submit your application and monitor its status via the **Project Overview** page in MineSpace.

After submission

Ministry staff will review your application and may contact you for further information.

You will receive email and in-app notifications regarding status updates.

You may add files or update certain fields while your application is in “**Submitted**” or “**Changes Requested**” status. For changes outside editable states, contact the **Major Mines Office** at permrecl@gov.bc.ca.

Submitting Information Requirements Table (IRT)

If your **Project Description** indicates that your submission involves a **Mines Act review** or a **joint Mines Act and Environmental Management Act (EMA) review**, you will be prompted to complete and submit an **Information Requirements Table (IRT)** as part of your application process in MineSpace.

NOTE: Information Requirements Tables (IRT) can only be submitted once a Project Description is successfully submitted through MineSpace.

1. Navigate to your mine’s **Overview** page and select the **Applications** tab.
2. Ensure the **Major Mine Applications** tab is selected.
3. Locate your project and click the **pencil icon** to open the **Project Overview**.
4. Find the **IRT project stage** and click the **Start** button.
5. On the **Start IRT Submission** page, click **Start** to begin a new submission.
6. Download the **IRT Template Excel spreadsheet** provided on the page.
7. Complete the template using the required format. **NOTE:** This template aligns with the **Joint Application Information Requirements (JAIR)** structure. Do not alter the structure of the template, as this may result in submission errors.
8. Click **Continue to Import** and upload your completed IRT file. Use the naming convention: YYYY MM DD – Short Descriptive Title (max 50 characters). If the upload is successful, a confirmation pop-up will appear.
9. Review the auto-populated data from your uploaded IRT. If corrections are needed, return to the **Import File** page and upload a revised version.
10. Once satisfied, click **Submit IRT** to finalize your submission.

After submission

Once your IRT has been submitted, the Major Mines Office will be notified automatically. A Permitting Inspector will review your IRT and may contact you for clarification or additional information. Your designated Project Contact(s) will receive email updates and in-app notifications regarding the status of your IRT review.

You may replace your IRT file while the submission status is **Submitted** or **Changes Requested**.

For changes outside editable statuses, contact the **Major Mines Office** at permrecl@gov.bc.ca.

Environmental Management Act Information Requirements Table

For *Environmental Management Act* (EMA) permit or approval applications, please attach the Information Requirements Table (IRT) as part of the Project Description submission.

IRT documents can be attached under the **Document Upload** page, under **Supporting Documents**.

Submitting Final Applications in MineSpace

Once your **Project Description** has been successfully submitted, you may proceed to submit your **Final Application Package**. This step is required to complete your application for a new permit or an amendment under the *Mines Act*, the *Environmental Management Act* (EMA), or both.

Application Streams

You may submit your Final Application under one of the following streams:

- Mines Act only
- Joint Mines Act and EMA (coming soon)
- EMA only (coming soon)

NOTE: Applications or Final Applications can only be submitted once a Project Description is successfully submitted through MineSpace.

Mines Act or Joint Mines Act and EMA Applications

1. Access the Final Application Stage

- a. Log in to MineSpace.
- b. Navigate to your mine's **Overview** page.
- c. Select the **Applications** tab and ensure the **Major Mine Applications** tab is active.
- d. Locate your project and click the **pencil icon** to open the **Project Overview**.
- e. Find the **Major Mines Application and Final Package** stage and click **Start**.

2. Upload Required Documents

- a. On the **Create Submission** page:
- b. Upload your **Primary Application Document**.
- c. Upload **Appendix Documents** and **Supporting Files** as needed.

- i. It is mandatory to tag each file with a **descriptive label** for these uploaders (coming soon).
 - ii. Select an option from the drop-down menu that will show once you upload a file. This will associate the document with the document label (coming soon).
 - iii. Only one document label can be added for each file (coming soon).
 - d. Upload **Spatial Files** using the designated uploader (ensure BC Albers projection and correct file bundle).
 - e. Use the naming convention: YYYY MM DD – Short Descriptive Title (max 50 characters).
- 3. Review and Manage Files**
- a. On the **Review & Submit** page:
 - b. Add, replace, or archive files as needed.
 - c. Replaced files remain accessible in the record.
 - d. Archived files are excluded from review but retained for reference.
- 4. Confirm and Submit**
- a. Check the **Confirmation of Submission** box.
 - b. Click **Submit Now** to finalize your application.
 - c. A confirmation message will appear.
 - d. Return to the **Project Overview** to view submission status.

EMA-Only Applications (coming soon)

- 1. Confirm Tracking Number**
- a. Ensure your EMA application has a **tracking number**.
 - b. If no tracking number is present, the **Manage Final Application** page will not be accessible.
 - c. A tracking number confirms that the Ministry of Environment and Climate Change Strategy has received your submission.
- 2. Access Final Application Upload**
- a. From the **Project Overview** page:
 - b. Locate the **Application and Final Package** stage.
 - c. Click Actions next to the relevant EMA authorization.
 - d. Select **Manage Final Application**.
- 3. Upload Required Documents**
- a. On the **Basic Information** page, enter required details and click **Save & Continue**.
 - b. Upload your **Final Application Documents**:

- c. Indicate if any documents were already submitted in the Project Description.
- d. Upload additional files using drag-and-drop or the **Browse** button.
- e. Use the naming convention: YYYY MM DD – Short Descriptive Title (max 50 characters).
- f. Tag each file with a **descriptive category label**.

Table 1 List of descriptive categories for *Environmental Management Act (EMA)* application files

Category Label	Explanation
Application Instruction Document	Short document summarizing your application and explaining how the submission is organized.
Clause Amendment Form	Attach this form if you are asking to change a condition or clause in an existing EMA permit or approval (amendments are allowed under EMA permitting provisions).
Discharge Factor Form	Completed form showing the types and amounts of waste or emissions you are proposing to discharge.
Information Requirements Table of Concordance	A table matching each regulatory requirement to where it is addressed in your submission.
Location Map	Map(s) showing the project location, boundaries, access points, and nearby environmental features or receptors.
Notification and Engagement Report	Report outlining who you notified (such as Indigenous Nations or local governments), when, and what feedback you received.
Qualified Professional Declaration Form	Signed form where a Qualified Professional confirms that the technical information in your application is complete and accurate.
Site Plan	Scaled drawing of the site layout, infrastructure, discharge points, and environmental protection measures.
Supporting Documents	Any additional materials needed to support your application—studies, reports, drawings, or other relevant evidence.
Technical Assessment Report	Detailed technical report (often by a Qualified Professional) that evaluates environmental effects, risks, modelling, mitigation, or compliance considerations under the EMA.

4. Declaration and Submission

- a. Review the declaration statement.
- b. Confirm your agreement by checking the declaration box.
- c. Click **Submit** to finalize your EMA Final Application.

After Submission

Upon submission of your final application, the application will be reviewed by the appropriate ministry. You will receive email and in-app notifications regarding status updates.

If changes are required, your application status will be updated to **Changes Requested**, allowing you to upload revised documents. For changes outside editable statuses, contact the **Major Mines Office** at permrecl@gov.bc.ca.

Notice of Departure Applications in MineSpace

Under [Section 10.1.18 of the Health, Safety and Reclamation Code for Mines in B.C.](#), written authorization from the Chief Permitting Officer is required for any substantial changes to an existing mine plan and reclamation program.

Major coal and metal mines should first assess whether the proposed change is considered a substantial or non-substantial departure by reviewing the [Departure from Approval Guidance for Major Mine Permit Holders guidance document \(PDF, 577KB\)](#) and by completing the [Self-Assessment Form \(DOCX, 104KB\)](#).

Results of the self-assessment form can be saved as a record in MineSpace.

NOTE: Projects that are **substantial, or potentially substantial**, should be submitted through MineSpace to proceed through a Notice of Departure (NoD) or *Mines Act* permit amendment process. No works can commence until written authorization is received.

Submitting a Departure from Approval (Notice of Departure) in MineSpace

1. From your mine's Overview page, click the **Notice of Departure** page on the left-side panel.
2. Click on **Create a Notice of Departure** to start the submission process.
3. Add a descriptive title for your notice of departure record.
4. Select the permit number that you are submitting a notice of departure record for. Note, only permits for your mine will be available to be selected.

5. Provide a brief description of the reason for the changes to the existing mine plan or reclamation program.
6. Provide the First Name and Last Name of the person who the Ministry can contact regarding the Notice of Departure.
7. Provide the phone number and email address of the person who the Ministry can contact regarding the Notice of Departure.

Figure 7: Example of basic information and contact details that are required for a notice of departure self-assessment record in MineSpace.

Submitting projects that are assessed as non-substantial changes to permitted activities

1. Projects that are assessed as **non-substantial** changes to your permit can be saved as a record in MineSpace by selecting **"This Notice of Departure is non-substantial and does not require ministry review."**
2. Provide your completed self-assessment form in the file uploader. You can either click the uploader box to open your file browser or drag and drop accepted file types into the uploader.
 - a. Accepted file types are listed on the file uploader.
 - b. The maximum file size accepted for individual files is 750 MB.
3. Upload additional supporting files for your notice of departure determination.
4. Select **Save Changes** to save the record for your mine.
5. Submitting a self assessment that is determined as non-substantial by the mine manager does not trigger notification to the ministry and will not be reviewed by the ministry.

Figure 8: Select the first option under the Notice of Departure Self-Assessment Determination to save a self-assessment that does not require ministry review.

Submitting projects that are assessed as substantial or potentially substantial changes to permitted activities

1. Projects that are assessed as **substantial or potentially substantial** changes to your permit should be saved as a record in MineSpace by selecting **“This Notice of Departure is potentially substantial and requires ministry review.”**
2. Provide your completed self-assessment form in the file uploader. You can either click the uploader box to open your file browser or drag and drop accepted file types into the uploader.
 - a. Accepted file types are listed on the file uploader.
 - b. The maximum file size accepted for individual files is 750 MB.
3. Upload additional supporting files for your notice of departure determination.
4. Select **Save Changes** to submit the Notice of Departure self-assessment form for the Ministry to review.
 - a. When a mine manager determines that their self-assessment form is potentially substantial, or if they request ministry review by selecting the option of **Potentially Substantial** an **email notification is sent to major mines office** to notify that there is an action required to review the form.
 - b. By selecting **Save Changes**, there will be an **email notification sent to major mines office** to notify that there is an action required to review the form.

Figure 9: Select the second option under the Notice of Departure Self-Assessment Determination to submit a self-assessment that requires ministry review.

5. The status of the notice of departure record in MineSpace will determine where the review is at. The status will be updated by a ministry member and will show in real time in MineSpace.
6. The status of the notice of departure record in MineSpace will determine where the review is at. The status will be updated by a ministry member and will show in real time in MineSpace.
 - a. Information Required
 - b. Determined Non Substantial: ministry decision documentation will be viewable
 - c. Determined Substantial: ministry decision documentation will be viewable
 - d. Withdrawn

Withdrawing a Notice of Departure from Ministry Review

1. To withdraw a notice of departure from review for ministry staff, click the **pencil icon** on the right side of the record from the Notice of Departure table
2. Scroll to the bottom of the record and click **Withdraw Submission**.
3. Click on **Submit Notice of Departure** to save changes.
4. Your submission will be marked as withdrawn.

Chapter 5: Receiving permits through MineSpace

Notice of Work Permits

1. Navigate to your mine's **Overview** page by clicking on the name of the mine on the My Mines page.
2. On the left panel of the Overview page, click **Permits** to navigate to the list of permits associated with your mine.
3. Select the permit that is listed as permit type: **Mines Act Permit**.
4. To view a copy of the permit and associated documents, you can either:
 - a. Click on the **Expand (+)** button on the left of the permit number, OR
 - b. Click on **Actions > View** on the far-right side of the record.
5. Click on the **blue underlined file** to open it in a document viewer.
6. If your permit document is not viewable on MineSpace, contact your regional office to let them know. Contact details can be found on the Overview page for your mine. Please ensure to include the mine number and notice of work number in your communication.

Major Mines Permits

1. Navigate to your mine's **Overview** page by clicking on the name of the mine on the My Mines page.
2. On the left panel of the Overview page, click **Permits** to navigate to the list of permits associated with your mine.
3. Select the permit that is listed as permit type: **Mines Act Permit**.
4. To view a copy of the permit and associated documents, you can either:
 - a. Click on the **Expand (+)** button on the left of the permit number, OR
 - b. Click on **Actions > View** on the far-right side of the record.
5. Click on the blue underlined file to open it in a document viewer.
6. If your permit document is not viewable on MineSpace, contact the major mines office to let them know. Contact details can be found on the Overview page for your mine. Please ensure to include the mine number and notice of work number in your communication.

Explosives Storage and Use Permits

1. Navigate to your mine's **Overview** page by clicking on the name of the mine on the My Mines page.
2. On the left panel of the Overview page, click **Permits** to navigate to the list of permits associated with your mine.

3. Select the permit that is listed as permit type: **Explosives Storage and Use**.
4. You can either
 - a. Click on the **Expand (+)** button on the left of the permit number OR
 - b. Click on **Actions > View** on the far-right side of the record.

Figure 10: Explosive Storage and Use permits are available to view on the Permits page of MineSpace.

Figure 11: Click on the permit file name to download a copy of the file.

5. You can now view and download your permit files, including your letter of issuance and permit.
 - a. **NOTE:** If you select the record view mode, you can access additional details of your permit, including:
 - i. The contact details of the mine and mine manager the permit is issued to,
 - ii. the location, dimensions and maximum allowed number and type of explosives and detonator magazines,
 - iii. history of amendments to your permit,

- iv. issued files under *Supporting Documents*, and
- v. status of your permit

The screenshot shows the 'Explosives Storage and Use Permit' page in MineSpace. The page is divided into several sections: 'Explosives Permit Details', 'Storage Details', 'Supporting Documents', 'Permit Status', 'Explosives Magazines', 'Detonator Magazines', and 'Permit History'. Callouts are present: one pointing to the 'Supporting Documents' section stating 'You can access your permit's issuance letter and a copy of the permit here'; another pointing to the 'Explosives Magazines' and 'Detonator Magazines' sections stating 'You can expand to see details of magazine and detonators here'; and a third pointing to the 'Permit History' table stating 'You can access your permit's history here'.

Figure 12: View of key information regarding your Explosives Storage and Use permit, available under the Actions > View option.

6. If you see something incorrect or you are missing a permit for your Explosive Storage and Use permit details page please contact your regional operations coordinator directly. Contact details can be found on the Overview page for your mine. Please ensure to include the mine number and associated permit number in your communication.

Environmental Management Act Permits

Notification of the issuance of new, or amended, *Environmental Management Act* (EMA) authorizations will be provided via email or registered mail and include a copy of the authorization. To find existing EMA waste discharge authorizations associated with your mine, please follow the steps provided below.

1. Navigate to your mine's **Overview** page by clicking on the name of the mine on the My Mines page.
2. On the left panel of the Overview page, click **Applications** to navigate to the list of **Major Mine Applications** associated with your mine.
3. Click on the pencil icon on the far right of the project that is associated with your *Environmental Management Act* authorization.
4. Scroll down to the Environmental Management Act (EMA) Applications table, then click **Actions > View Ministry Documents** to view your permit.

Alternatively, you can navigate to [Ministry of Environment and Parks' Find Authorization Information webpage](#) and follow steps outlined listed under **Authorization documents**.

Digital Permit Credentials

Mining companies that are registered in British Columbia and are permitted by the Chief Permitting Officer of British Columbia to undertake mining activities are eligible to hold a *Mines Act* digital credential.

Request a Mines Act permit digital credential for my organization's wallet

1. Navigate to your mine's **Overview** page by clicking on the name of the mine on the My Mines page.
2. On the left panel of the Overview page, click **Permits** to navigate to the list of permits associated with your mine.
 - a. This tab lists all permits associated with your mine.
3. Next, click on the '**Digital Permit Credentials**' tab. This is where you can manage and request digital credentials for eligible permits.

Figure 13 Location of the Digital Permit Credentials tab, where you can action a request for a digital connection to your organization's digital wallet.

4. Find the permit you want to issue as a digital credential. Make sure it's an **active Mines Act permit**—only active ones are eligible.
5. On the right-hand side of the permit row, click the '**Actions**' button.
6. From the dropdown, select '**Issue as Digital Credential**.'

Figure 14 Select "Issue as a digital credential" to issue a *Mines Act* digital credential to your organization's digital wallet.

- Once issued, the credential will be available for download or integration with your digital wallet.

You can now share it securely with regulators or third parties.

Figure 15 Example of a *Mines Act* digital credential available for you to integrate with your digital wallet.

Publicly available digital credentials

- A public Mines Act digital credential is now available on the [OrgBook BC](#) website, which serves as a public directory of trusted digital credentials issued by the province.
- The process was built through a collaboration between Ministry of Mining and Critical Minerals and Citizens Services digital teams. This credential provides a secure, verifiable way to confirm that a mine holds an active permit issued by the Chief Permitting Officer in British Columbia.
- The credential is currently **only issued for medium to large mining operations that have an active *Mines Act* permit**. It ensures that only valid, up-to-date permit information is shared.
- Anyone can view these credentials on the OrgBook BC website, which serves as a public directory of trusted digital credentials issued by the province.
- Visit OrgBook to view your public Mines Act digital credential: [OrgBook BC](#)

How to View your Public Mines Act Digital Credential

1. Go to the **OrgBook BC website**: <https://orgbook.gov.bc.ca/search>
2. Use the search bar to enter your **BC-registered company name**.
3. Once on your company's profile page, click the **"Credentials"** tab at the top.
4. To narrow your results:
 - a. Select **Authority: Chief Permitting Officer**, or
 - b. Select **Credential Type: BCMinesActPermitCredential**.
5. You can also filter by **Active** or **Inactive** credentials.
6. If you don't see a permit you expect to appear, contact your **regional mines office** or the **Major Mines Office** for assistance. Please ensure to include the mine number and associated permit number in your communication.

The screenshot displays the OrgBook BC website interface. The header includes the British Columbia logo, the text 'OrgBook BC', and navigation links for 'Home', 'About', and 'Contact'. The main content area is divided into a left sidebar with filters and a right pane showing the credential details.

Want to Learn More About Digital Credentials?

- Mines Digital Trust: <https://digital.gov.bc.ca/design/digital-trust/emdt/>
- Mines Digital Trust: The Future of Global Supply Chains: <https://www.lfdecentralizedtrust.org/blog/energy-mines-digital-trust-the-future-of-global-supply-chains>
- If you have questions about whether you are eligible for a digital credential, please contact the major mines office for your mine (contact details are located on your mine's overview page).

Chapter 6: Viewing Your Mine's Inspection History

You can view a record of your mine's inspection and order history in relation to the *Mines Act (1996)* or *Health, Safety and Reclamation Code* in British Columbia through MineSpace. This section explains how to access and interpret the inspection records.

NOTE: MineSpace does not currently accept responses to orders, and all correspondence must be completed through the issuing inspector or alternative ministry representative.

Where to find Information about Inspections for your mine

1. In MineSpace, select the mine in your list of approved mines that you want to view the history of site and desktop inspections and orders relating to *Health, Safety and Reclamation Code of B.C* (HSRC) or *Mines Act* regulations.
2. Once in the mine's record, select **Inspections** on the left panel. On this page, you can:
 - a. View the number of inspections completed in the year to date, and date of last inspection date for your mine.
 - b. View the number of overdue orders and responses due to the ministry.
 - c. View the high-level details of orders issued to your mine.

Figure 17: Summary of the information shown on the inspections dashboard.

The screenshot shows the 'Inspections' page in MineSpace. It includes a sidebar with navigation options like Overview, Applications, Permits, Inspections, Reports, Incidents, Notices of Departure, Variances, Bonds, and Tailings & Dams. The main content area displays a table of inspection orders. Callouts provide additional context: one points to the 'Order No.' column stating it refers to the Mines Act or HSRC section in non-compliance; another points to the column headers stating they can be sorted by clicking; a third points to the 'Due Date' column stating it shows when a response is due; and a fourth points to a red circle icon in the 'Order Status' column stating it highlights overdue responses.

Order No.	Violation	Report No.	Inspection Type	Inspector	Order Status	Due Date
242242-4	4.11.2	242242	Health and Safety	CHCOCHRA	Overdue	Apr 25 2025
242242-6	2.4.1	242243	Health and Safety	CHCOCH	Overdue	Apr 25 2025
242242-1	3.9.1	242242	Health and Safety	CHCOCHR	Overdue	May 02 2025
		342183	Health and Safety	CHCOCHRA	Open	May 15 2025
		242218	Health and Safety	CHCOCH	Open	May 20 2025
221883-3		221883	Health and Safety	CHCOCH	Open	May 25 2025

Figure 18: On the Inspections page you can view overdue responses, refer to the *Mines Act or Health, Safety and Reclamation Code* section of non-compliance, and find due dates.

Additional Resources

- Information on mining compliance and enforcement can be found here: [Mining Compliance & Enforcement - Province of British Columbia](#).
- If you have questions about inspections or orders relating to your mine, please contact the health and safety inspector or major mines office for your mine (contact details are located on your mine's overview page).

Chapter 7: Meeting report compliance requirements in MineSpace

MineSpace is the official platform for submitting **permit-required** and **code-required** reports for mining operations in British Columbia. This guide walks you through the steps to submit a report accurately and securely.

Before You Start

What can be submitted?

- **Code-required reports** are those mandated under the Health, Safety and Reclamation Code for Mines in British Columbia. These reports ensure compliance with provincial standards for mine safety, environmental protection, and reclamation.
- **Permit-required reports** are specific to the operating conditions outlined in a mine's permit. These may vary by site and are essential for maintaining regulatory oversight.

Where to submit?

- Through <https://minespace.gov.bc.ca> under the **Reports** tab for your mine record.

Accepted file types:

- Most standard formats. Check **Accepted File Types** next to each uploader in MineSpace.

File size limit:

- Up to **750 MB per file**.

NOTE: As of **April 1, 2025**, it is mandatory for all **regional operations** to submit **permit-required** and **code-required** reports through **MineSpace**. Major Mines are also required to submit reports through MineSpace. However, the Major Mines Office will continue to accept report submissions via email at **permrecl@gov.bc.ca**.

Navigate to the Reports section of your mine record

1. Once logged in to MineSpace, click on the **mine record** you want to submit a report for.

2. Go to the **Reports** section on your mine record and select **Submit Report** (top right button).
3. Note: A **red circle indicator** appears if there are **overdue reports**.

Figure 19: Reports page can be navigated to from the mine's Overview page. Note, if there are overdue reports it will be indicated by a red circle.

Functions of the Reports Page

The **Reports Page** includes three key features organized into tabs and actions:

1. **All Reports** tab
 - a. Displays a list of all reports submitted from your mine through MineSpace
 - b. Includes filters for report type, submission date, and submission status.
 - c. Allows you to download or view submitted reports.
2. **Upcoming Reports** tab
 - a. Displays a list of reports that have digitally available deadlines
 - b. Allows you to filter the list up to 1 year in advance
 - c. Allows you to submit a report directly from the table
3. **Submit a New Report** tab
 - a. A button or link labeled **"Submit Report"** is available on the page.
 - b. Clicking this opens the submission form where you can:
 - i. Select the report type (Permit-required or Code-required).
 - ii. Upload documents and enter required details.
 - iii. Save a draft or submit the report directly.
 - c. Best used for reports that are event-based or do not have digitally available deadlines.

Find Submitted Reports

On the **All Reports** page, you can find previously submitted reports for your mine by one of the following:

1. **Filtering by Mine Site, Report Type, or Date**
 - a. Use the **search bar** to enter keywords such as report name, permit ID, or code section.
 - b. Apply filters:
 - i. **Compliance Year** – select the year of reporting.
 - ii. **Submission Status** – e.g., Received, Requested, Overdue.
 - iii. **Report Type** – choose Code-required or Permit-required.
 - c. Click **Apply Filters** to refine the list.
2. Use the sort functions at the top of the table's columns to sort by alphabetical or numerical order.
3. **Downloading or Printing Previously Submitted Reports**
 - a. To view submitted files, click on the **Actions** menu to the right of the report and click **View** to open the report details page.
 - b. From the report details page, you can:
 - i. **Download** the submitted file(s).
 - ii. Open a **Print view** of the report details for your records.
4. Viewing report requirements that have not been submitted
 - a. To view report requests that have not yet been submitted, click on the **Actions** menu to the right of the report and click **Submit** to open the report details page.
 - b. Follow the steps outlined in [Submit a New Report](#) section to complete the report submission

NOTE: Use the pagination controls at the bottom of the page to navigate through multiple results.

Report Name	Permit #	Compliance Year	Due	Submitted On	Requested By	Status

Submit a New Report

MineSpace allows you to submit two types of reports:

- **Code-Required Report:** Mandated under the *Health, Safety and Reclamation Code for Mines in British Columbia*.
- **Permit-Required Report:** Specific to conditions outlined in your mines permit.

1. To submit a new report, first navigate to the **Reports Page**.
 - a. Log in to MineSpace using your **BCeID** credentials.
 - b. From the dashboard, select **My Mines** and choose the mine you want to submit a report for.
 - c. Click **Reports** in the left-hand menu.
 2. From the Reports page you can submit reports in different ways.
 - a. For reports that have **specific due dates** entered into MineSpace:
 - i. Find the report in the **All Reports** table, then click **Actions > Submit** to open the correct page to submit that report.
 - ii. Go to the **Upcoming Reports** page and find the report that you want to submit. Click **Actions > Submit** to open the correct page to submit that report. You can use the date range filter to find reports that are overdue, or due in 90 days, 6 months or up to 1 year in advance.
 - b. For permits that have not yet had all report due dates added, or for a report that does not have a due date (*e.g. submit report after X activity is completed*) use the Submit Report button in the top right corner of the Reports page.
 3. **Choose the Report Type**
 - a. On the **Submit New Report** page, select the appropriate report option:
 - i. **Code Required Report:** For reports mandated under the *Health, Safety and Reclamation Code for Mines in British Columbia (HSRC)*.
 - ii. **Permit Required Report:** For reports required under conditions in your site-specific Mines Act permit.
- NOTE:** Some options under **Code Required Report** may appear greyed out. If this happens, you will need to submit the report as a **Permit Required Report** under the relevant section of your permit.
4. **On the Report submission page, Enter Report Details**
 - a. **If submitting a Code-Required Report:**
 - i. Use the **Report Code Requirement** dropdown to select the relevant code section or report name.
 - ii. You can also choose from the **Common Reports** list for quick access (*e.g., Annual Reclamation Report, ITRB Activities Report*).
 - iii. Review the description in the right-hand panel to confirm requirements.
 - iv. Click **Add Report Details**.

b. If submitting a Permit-Required Report:

- i. Select the **permit number** associated with your mine.
- ii. If your permit has been reviewed for specific report requirements, you can select the **specific permit condition** to submit against.
- iii. If your permit has not yet been reviewed for specific report requirements, choose the **permit condition category** (e.g., General Conditions, Health and Safety Conditions).
- iv. Click **Add Report Details**.

NOTE: If you are submitting files for multiple **Permit Required** or **Code Required** reports, **each report must be submitted separately**.

5. For all report submissions, add report information

- a. Enter a **report description** (e.g., “Annual Summary of Placer Activities”).
- b. Select the **compliance year** and add a due date if applicable.
- c. Confirm **mine manager details** (they will receive a notification).
- d. Upload your file(s) by dragging and dropping or using the **Browse** button.
 - i. Accepted file types: most common document, image, spreadsheet, and spatial files (max size: 750 MB).

6. Review and Submit

- a. Double-check all details on the **Review & Submit** page.
- b. If correct, click **Submit**.
- c. You’ll see a confirmation message once your report is successfully submitted.

7. After Submission

- a. Access submitted reports anytime under the **Reports** page.
- b. If a report was requested by the Ministry, you can click **View** to open and submit directly.

View Upcoming Report Deadlines

Report due dates are based on permit conditions or code requirements.

- All code-required report requirements that have date deadlines are available based on the latest *Health, Safety and Reclamation Code* (HSRC) requirements.
- If you notice a missing HSRC report, check the **Submit Report** feature, and if it’s still not available, contact us at MDS@gov.bc.ca

- Currently, select mines have permit-required report deadlines available in MineSpace, with future updates of MineSpace including all permit-required report deadlines.
- If you want to have your permit required reports listed as priority, please contact your regional mines office or major mines office to voice your need.

Once Your Report is Submitted

The Ministry will be notified of your application once you submit it through MineSpace. The mine manager on file will also receive an email notification that a new report has been submitted through MineSpace.

Once a report is submitted it will show with the status “Received.”

Additional statuses include:

- **Accepted:** Ministry has completed review and no changes are required.
- **Changes Requested:** Ministry requests additional information.
- **Changes Received:** Additional information has been provided by the mine proponent and are awaiting review.
- **Not Requested:** The report was submitted without explicit request from the Ministry.
- **Report Requested:** A report has been identified by the Ministry and is required to be submitted to stay in compliance.
- **Withdrawn:** A submitted report was withdrawn and will not be reviewed by the Ministry.
- **Overdue:** The identified due date for the report has lapsed and the report has not been received by the Ministry.

Make Changes to Report Submissions

1. How to edit a report before the deadline:
 - Currently there is no way to directly update the report submission once it has been submitted through MineSpace.
 - If you require changes to your submission you will need to contact your regional mines office or Major Mines Office. A Ministry user can update reports on your behalf.
2. What to do if a report has already been submitted:
 - The Ministry will be notified by email notification when your application is submitted. You should receive a pop confirmation that it has been sent to the Ministry and the status of your report should now indicate as “received.”

3. Submitting corrections or updates:
 - Currently there is no way to directly update the report submission once it has been submitted through MineSpace.
 - If you require changes to your submission you will need to contact your regional mines office or Major Mines Office. A Ministry user can update reports on your behalf.
4. Want to update your own reports? Let us know at MDS@gov.bc.ca

Getting Help

- **What if my file won't upload?** Ensure it's in the correct format and within the size limit. Try refreshing the page and uploading again.
- **Can I edit or replace my file after submission?** Currently there is no way to directly update the report submission once it has been submitted through MineSpace. If you require changes to your submission you will need to contact your regional mines office or Major Mines Office. A Ministry user can update reports on your behalf.
- **Who can access my submitted files?** Only authorized personnel reviewing your permit or code requirements.
- For further assistance, check the help guidance on each page in MineSpace (?) or contact MDS@gov.bc.ca

Chapter 8: Submit a Reportable Incident for your mine

The following chapter is a quick guide on how to report incidents that result in, or had the potential to result in, serious injury, illness or loss of life through MineSpace.

Navigating to report a reportable incident

1. In MineSpace, select the mine in your list of approved mines that you want to report an incident that result in, or had the potential to result in, serious injury, illness, or loss of life (reportable incident).
2. Once in the mine's record, select **Incidents** on the left panel.
3. On this page, you can:
 - a. View the history of reportable incidents that are saved in MineSpace for your mine,
 - b. Create a record of a reportable incident for review and recommendation by Major Mines Office and
 - c. Navigate to find more information on reportable incidents (live link).

How to view an incident record that was reported for your mine

1. In MineSpace, select the mine in your list of approved mines that you want to view a reportable incident for.
2. Once in the mine's record, select **Incidents** on the left panel.
 - a. On this page you will see a table of all reportable incidents for your mine that are saved in MineSpace.
3. Each incident entry includes the following:
 - a. Unique incident number
 - b. Data and time of the incident
 - c. Who the incident was reported by
 - d. The determination by the Ministry of whether it was a dangerous occurrence
 - e. The status of the incident review
4. Find the reportable incident that you want to view and click the **Details** button next to the incident.
 - a. This opens the full incident record, where you can see:
 - i. Reporter information
 - ii. Incident description
 - iii. Notification details

- iv. Uploaded documents status updates
 - v. Any final reports (if submitted)
5. Each incident has a **status label** that tells you where it is in the review process. The following table lists reportable incident statuses and what they mean.

Status	Explanation
Awaiting Final Report	An initial incident report was submitted to MCM for notification and review. The incident requires a final report to be submitted within 60 days from time of the incident.
Final Report Submitted	Investigation report (final report) has been submitted to the Ministry for review.
Information Missing Status	This reportable incident is missing critical information. The proponent has been notified that further information is required.
Investigating	This incident currently is under MCM investigation.
MIU	This incident currently is under the Mines Investigation Unit (MIU) investigation.
Reviewing Severity Status	Further clarification is being requested by the proponent to determine the severity of the incident.
Under Review	The reportable incident is under MCM review.
Closed	The reportable incident has been reviewed, and the investigation is closed.

6. If you want to download or view documents for your incident record, scroll to the Documentation or Final Report section then click on any uploaded file to view or download it.
7. Click **Cancel** to return to your mine's incident summary table.

How to record a mine incident in MineSpace

1. Before you begin, make sure:
 - a. You have access to MineSpace.
 - b. You know which mine the incident occurred at.
 - c. You have basic details about the incident (date, time, what happened, who was notified).

2. In MineSpace, select the mine in your list of approved mines that you want to submit the final investigation report.
3. Once in the mine's record, select **Incidents** on the left panel.
4. From the Incidents page, click on **Record a mine incident** button located on the top right side of the page.
 - a. A new form will open for you to fill out.
5. Check important information regarding timelines for notification of incidents and what is expected once you have reported the incident.
 - a. Note: Reportable incidents that cause **serious injury** or **loss of life** must be **reported verbally to the ministry within 4 hours** of the incident occurrence.
6. Click '**Create Record**' to start the reporting process or Cancel to exit without reporting an incident.
7. Fill in the reporter's information.
 - a. Fill in your:
 - i. Full name
 - ii. Phone number
 - iii. Email address
 - b. Fields marked with a red asterisk (*) are required.
8. Describe the incident.
 - a. In the Incident Details section, describe what happened.
 - i. Be clear and factual.
 - ii. Do not include names of people involved in the incident.
 - b. Enter the date and time of the incident.
 - i. Use local time for accuracy.
9. List who was notified.
 - a. Provide the names and contact details of people who were notified about the incident (e.g. supervisors, safety officers).
 - b. Fields marked with a red asterisk (*) are required.
10. Upload supporting documents (optional).
 - a. If you have any documents (photos, reports, etc.), upload them in the Supporting Notification Documentation section.
 - b. You can:
 - i. Drag and drop files into the upload area, or
 - ii. Click the upload box to browse your computer.
 - c. A green highlight means the file uploaded successfully.
 - d. You can skip this step and upload documents later if needed.

11. Review and submit the report.
 - a. Once all required fields are filled, the **Review and Submit** button will become active.
 - b. Click it to review your report.
 - c. At the bottom of the review page, check the **Confirmation of Submission** box.
 - d. Click **Submit Now** to submit the report to the On-Call Inspector
12. Receive confirmation of your report submission.
 - a. You will receive an **email confirmation**.
 - b. The Ministry of Mining and Critical Minerals will also receive immediate notification.
13. You can return later to the incident record to:
 - a. Add more documents.
 - b. Submit a final investigation report.
14. The incident status will be updated as it moves through the review process.

The screenshot shows the 'Incident Details' form in the MineSpace system. The form includes fields for Incident Location (Surface/Underground), Incident date and time, Proponent incident number, Number of injuries, Number of fatalities, and a Description of incident. A callout bubble points to the 'Description of incident' field with the text: 'Important Note: Please do not include names of persons involved when completing the Description of Incident field.'

Incident Details
 Enter more information regarding the reported incident. Some fields may be marked as optional but help the ministry understand the nature of the incident, please consider including them.

* Incident Location
☐ Surface ☒ Underground

* Incident date and time
 2025-05-15 11:10 -07:00 PDT

Proponent incident number (optional)
 DC-59-001

Number of injuries (optional)
 1

Number of fatalities (optional)
 0

Were emergency services called? (optional)
☐ Yes ☒ No

* Description of incident
 While conducting routine maintenance near the conveyor belt in Section 9 of the underground mine, a worker sustained a minor injury. The worker was in the process of tightening a loose bolt on the support structure when their hand slipped, causing a minor laceration to the back of their left hand from a protruding piece of metal. The area had been deemed safe for work, and proper PPE was being worn, including gloves, but the sharp edge had not been previously identified or flagged. The worker immediately reported the injury to their supervisor and was escorted to the onsite medic. The wound was cleaned and bandaged, and the worker was able to return to light duties the same day.

Immediate measures taken (optional)
 The hazard was marked, and corrective action was taken by grinding down the sharp edge and updating the pre-task hazard checklist for that area.

If any injuries, please describe (optional)
 Minor laceration to the back of the worker's left hand.

Figure 21: Example description for a reportable incident.

How to provide your reportable incident's final report

1. Before you begin, make sure:
 - a. you have already submitted an initial incident report in MineSpace,
 - b. you have the final investigation report file ready (PDF, DOCX), and
 - c. you know which mine and incident the report belongs to.

2. In MineSpace, select the mine in your list of approved mines that you want to submit the final investigation report.
3. Once in the mine's record, select **Incidents** on the left panel.
4. Find the incident you want to submit a final report for. Look for a status that says, **"Awaiting Final Report"**.
5. Click the **Details** button next to that incident.
6. Scroll down to the section labeled **"Final Report Documents"**.
7. Click the **+ Add Final Report** button.
8. Choose your file:
 - a. Either drag and drop the file into the upload area, or
 - b. Click the upload box to browse and select the file from your computer.
9. Wait for the file to turn green—this means it uploaded successfully.
10. If you need to remove the file, click the green X next to it.
11. Once your file is uploaded, scroll to the bottom of the page.
12. Click the **"Submit"** button to send your final report.
13. A confirmation message will appear, and an email notification will be sent to:
 - a. You (the reporter), and
 - b. The Ministry of Mining and Critical Minerals
14. Return to the Incidents page for your mine.
15. The status of the incident should now say **"Final Report Submitted."**
16. The Ministry will review your report and update the status as the review progresses.

Find more information about reportable incident requirements

- Technical issues? Email: MDS@gov.bc.ca
- Questions about reporting requirements? Contact your **Health and Safety Inspector** (details are on your mine's overview page).

Chapter 9: Applying for a Variance to HSRC for your mine

The process for requesting a variance from a provision of the *Health, Safety and Reclamation Code for Mines in BC* (HSRC) for a particular mine, as per Section 13 of the *Mines Act* and sections 1.2.1 to 1.2.3 is defined in guidance located here:

[variance guidance document.pdf](#)

Navigating the Variances Page

1. In MineSpace, select the mine in your list of approved mines that you want to view the variance request history for.
2. Once in the mine's record, select **Variances** on the left panel.
3. On this page, you can:
 - a. View the history of variance requests and their determination for your mine.
 - i. You can sort the order of the records by clicking on the grey arrows on the table's header
 - ii. You can view documentation for applications that were submitted through MineSpace by clicking on the blue file name.
 - b. Apply for a variance to the HSRC for your mine.
 - c. Track the review status of your application.
 - d. Receive important information about your variance request, including requests for further information and determination of the request.

The screenshot shows the MineSpace interface for the 'Dark Crystal' mine (number 2000105). The 'Variances' section is active in the left sidebar. The main content area displays a table of variance history. Callouts highlight the following features:

- Apply for a variance here:** Points to the 'Apply for a Variance' button in the top right corner.
- You can sort records by clicking on this icon:** Points to the grey arrow icon in the 'Expiry Date' header of the table.
- You can view or download submission documents by clicking on the document link or by clicking 'Details':** Points to the 'Test_1.pdf' link and the 'Details' button in the first row of the table.

Variance No.	Code Section	Submitted On	Application Status	Issue Date	Expiry Date	Inspector	Approval Status	Documents
233	1.5.1 - Hours of Work	May 12 2025	In Review	-	-	-	-	Test_1.pdf Details
234	2.1.2 - Shifts Longer Than 8 hours	May 12 2025	In Review	-	-	-	-	test2.pdf Details

Figure 22: Key Features of the Variances Page: View Requests, Sort Entries, and Start a New Application

How to submit a request for a variance to HSRC

1. To apply for variance to the HSRC for your mine, click on the **Apply for a Variance** button on top right of the page.
2. **Select the corresponding section of the HSRC that the application relates to** using the drop-down selector.
 - a. If you cannot locate the correct part of the Code in the drop-down menu, please contact your Health and Safety Inspector. Contact information can be found on the Overview page of your mine.
 - i. Ensure to include reference to the part of the HSRC that you are attempting to submit your application for.
3. **Add a brief description** of the requested variance. *Example: "Request for extension of normal working hours due to the remote location of the mine and time to travel to and from the site."*
4. **Attach your supporting files** in the file upload box.
 - a. You can either click the uploader box to open your file browser or drag and drop accepted file types into the uploader.
 - b. Accepted file types are listed on the file uploader.
 - c. The maximum file size accepted for individual files is 750 MB.
5. Once you have filled out the fields, click **Submit** to formally submit the request to the Ministry.
 - a. Once you submit your application for variance to HSRC, it will automatically send an email notification to the ministry. A representative of the ministry will be in contact with the mine manager on file if further information is required.

How to Respond to Each Variance Application Status in MineSpace

Once you submit a variance request to the *Health, Safety and Reclamation Code* (HSRC) through MineSpace, the Ministry will update the status of your application. These updates happen in real time as the Ministry processes your application.

Here's what each status means and what you should do:

1. In Review

- a. What it means:
 - i. Your application has been received and is currently being reviewed by the Ministry.
- b. What you should do:
 - i. No action is needed right now.

- ii. Check back regularly in MineSpace for updates.
- iii. Be prepared to provide more information if the Ministry contacts you.

2. Not Applicable

- a. What it means:
 - i. The application may not meet the criteria for a variance or was submitted in error.
- b. What you should do:
 - i. Click **“Details”** on the variance record to see if the Ministry provided an explanation.
 - ii. If you require further explanation, contact your regional or major mines office for clarification.
 - iii. If needed, revise and resubmit your application with the correct information.

3. Ready for Decision

- a. What it means:
 - i. The review is complete, and the Ministry is preparing to make a final decision.
- b. What you should do:
 - i. No immediate action is required.
 - ii. Monitor MineSpace for a status change to Approved or Denied.
 - iii. Ensure your contact information is up to date in case the Ministry needs to reach you.

4. Approved

- a. What it means:
 - i. Your variance request has been approved.
- b. What you should do:
 - i. Click **“Details”** to download the official approval document.
 - ii. Review the conditions or limitations included in the approval.
 - iii. Implement the variance as approved and keep a copy for your records.

5. Denied

- a. What it means:
 - i. Your variance request was not approved.
- b. What you should do:
 - i. Click **“Details”** to read the Ministry’s decision or feedback.

- ii. Contact your regional or major mines office if you need clarification.
- iii. You may revise and resubmit your application based on the feedback provided.

6. Withdrawn

- a. What it means:
 - i. The application was withdrawn—either by your team or by the Ministry (e.g., due to inactivity or error).
- b. What you should do:
 - i. Confirm whether the withdrawal was intentional.
 - ii. If you still need the variance, submit a new application through MineSpace.

Managing and Receiving Documents Related to your Application

1. Before you begin, make sure you have submitted a variance application through MineSpace.
2. In MineSpace, select the mine in your list of approved mines that you want to view your variance record for.
3. Once in the mine's record, select **Variances** on the left panel.
 - a. You will see a list of all variance applications submitted for that mine.
4. Find the variance application you want to manage and click the **Details** button on the right side of the record.
 - a. This will open a new form that shows details of your application for variance.
5. Inside the variance record, scroll to the documents section.
6. Look for files labeled as:
 - a. **Request Document:** These are files uploaded by the Ministry asking for more information.
 - b. **Recommendation Document:** These may include the Ministry's review or suggestions.
 - c. **Decision Document:** This is the final decision on your variance request.
7. Click on any document link to view or download the file.
8. Check for updates regularly. The Ministry may update the variance record at any time. Check back in MineSpace frequently to:
 - a. View new documents
 - b. Monitor changes in status
 - c. Ensure you don't miss any requests or decisions

Responding to Ministry Requests (if needed)

If the Ministry uploads a **Request Document**:

1. Review the file carefully to understand what is being asked.
2. Prepare the required information or documents.
3. Return to the same variance record in MineSpace.
4. Upload your response or additional documents using the file upload section (if available), or contact the Ministry directly if instructed.

Figure 23: Different types of files that may form a part of communication for your request for a variance.

Chapter 10: Viewing Bonds History for your Mine

Navigating to view bond history

1. In MineSpace, select the mine in your list of approved mines that you want to view the bond history for.
2. Once in the mine's record, select **Bonds** on the left panel.
3. On this page, you can view the bond history of the mine, including details on the issue date, payer, type of bond and bond amount.
4. The types of bonds available to view include:
 - Safekeeping agreement
 - Letter of credit
 - Section 12 reclamation
 - Surety bonds
 - Cash

The screenshot shows the MineSpace interface for mine 'Dark Crystal' (mine number 2000105). The 'Bonds' section is active in the left sidebar. The main content area displays a table titled 'Bonds' with the subtitle 'This table shows bonds for your mine.' The table has columns for Permit No., Issue Date, Payer, Type, Amount, and Status. There are five rows of bond data.

Permit No.	Issue Date	Payer	Type	Amount	Status
-	Nov 01 2024	Test test	Safekeeping Agreement	\$5,000.00	Active
-	Mar 01 2025	Test test	Letter of Credit	\$2,000.00	Active
-	Nov 01 2024	Test test	Section 12 Reclamation	\$1,000.00	Active
-	Oct 01 2024	Test test	Surety Bond	\$6,000.00	Active
-	May 01 2023	Test test	Cash	\$7,000.00	Active

Figure 24: The bond history of your mine is available to view in MineSpace.

Further information regarding your mine's bond information:

1. Reclamation securities for mines in B.C.
 - a. <https://www2.gov.bc.ca/gov/content/industry/mineral-exploration-mining/permitting/mine-reclamation-securities>
2. If you have questions about your mine's permit obligations, please contact your regional office located on your mine's overview page
3. For technical issues, please contact MDS@gov.bc.ca

Chapter 11: Tailings and Dams Records in MineSpace

If your mine has a Tailings Storage Facility (TSF), you must manage key details directly in MineSpace.

This includes keeping the basic information, dam records, and assigned professionals (like the Engineer of Record and Qualified Person) up to date.

Before you begin, make sure you know basic details about your TSF, including:

- which *Mines Act* permit the TSF is permitted under,
- the facility type (e.g. in-pit, conventional, filtered/dry stack),
- the latitude/longitude location of the facility,
- consequence classification of the facility, and
- whether there is an independent tailings review board related to the facility.

Creating a Tailings Storage Facility Record in MineSpace

1. In MineSpace, select the mine in your list of approved mines that you want to create a Tailings Storage Facility (TSF) for.
2. Once in the mine's record, select **Tailings & Dams** on the left panel.
3. Click **+Create New Facility** at the top-right of the page to create a new TSF record.
4. Fill out the basic information relating to your facility. Fields marked with a red asterisk (*) are required.
5. Click on Save & Continue to navigate to the next page.

Add an Engineer of Record (EoR) on the Engineer of Record page

NOTE: Adding a new EoR will trigger a request for a report submission to the Ministry. This can be found on the Reports page for your mine. The due date for the report will be 72 hours from the day of the provided Start Date.

The EoR will be listed as "Pending" until the Ministry receives and reviews the letter of acknowledgement that accompanies the EoR contact.

1. Click **Manage Engineer of Record (EoR)**, then select **Assign a New Engineer of Record** to begin adding a new contact.
2. If the EoR is already listed as a contact for another Tailings Storage Facility (TSF) at your mine, choose their name from the **Select Contact** drop-down list.
3. If the EoR is not already associated with a TSF at your mine, manually enter their:
 - a. First and last name

- b. Email address
 - c. Phone number
- 4. Click **Create Contact** to link the person to the TSF record.
- 5. Under **Engineer of Record Term**, enter the **Start Date** for the EoR's term.
- 6. If known, enter the End Date of the term.
 - a. Providing an End Date will trigger an automatic email reminder to the Mine Manager before the term ends.
- 7. Click **Save & Continue** to save the contact and move to the next page.

Add a TSF Qualified Person

NOTE: Adding a new TSF Qualified Person (TSF QP) will trigger a request for a report submission to the Ministry. This can be found on the Reports page for your mine. The due date for the report will be 72 hours from the day of the provided **Start Date**.

- 1. Click **Manage Qualified Person** (TSF QP), then select **Assign a New Qualified Person** to begin adding a new contact.
- 2. If the TSF QP is already listed as a contact for another Tailings Storage Facility (TSF) at your mine, choose their name from the **Select Contact** drop-down list.
- 3. If the TSF QP is not already associated with a TSF at your mine, manually enter their:
 - a. First and last name
 - b. Email address
 - c. Phone number
- 4. Click **Create Contact** to link the person to the TSF record.
- 5. Under **TSF Qualified Person Term**, enter the **Start Date** for the TSF QP's term.
- 6. If known, enter the **End Date** of the term.
 - a. Providing an End Date will trigger an automatic email reminder to the Mine Manager before the term ends.
 - b. Click **Save & Continue** to save the contact and move to the next page.

Add Details of Associated Dams

- 1. Click **Create a new dam** to add details of individual dams that relate to the TSF record.
- 2. Select the following:
 - a. Type of dam,
 - b. Name associated with the dam,
 - c. the latitude/longitude location of the dam,

- d. the operating status of the dam (e.g. construction, operation, care and maintenance)
 - e. consequence classification* of the dam and
 - f. details of the elevation, freeboard and current dam height.
3. Click **Save and Return to Associated Dams** to navigate to save the details of the dam and return to the Basic Dam Information page.
 - a. You can add as many dams as associated to the TSF by repeating the process of adding associated dams.
4. Click **Submit** to save the full TSF record to the Ministry.

Submit written verification of your Engineer of Record or TSF Qualified Persons

1. Once you have submitted your record you can directly navigate to submit written verification for your Engineer of Record or TSF Qualified Person.
2. Click on **Submit Written Acknowledgement in Reports** to go to your report submission page.
3. Navigate to the Code Required Reports table and search for reports requested by **"system"**.
 - a. For new Engineer of Record contacts, the report is called Engineer of Record (confirmation).
 - b. For new TSF Qualified Persons, the report is called TSF or Dam Qualified Person (confirmation).
4. Find the report that was requested that you want to submit for.
5. On the right-hand side of the row, click the **Actions** button.
6. Select **View** to open a new page to submit your report.

Maintaining updated Information for Tailings Storage Facilities

1. You must **confirm or update your TSF records every year**, including:
 - a. Basic TSF information
 - b. Associated dams
 - c. EoR and TSF Qualified Person (TSF QP) details
2. Any changes to the EoR or TSF QP must be updated as soon as they happen (within 72 hours).
3. Click on the **Actions** button on the right-hand side of the TSF record and select **Edit**.
4. Once you have made your updates, click **Save & Continue** or **Submit** to save the changes.

- a. You can see when the last update was made by looking at the **History** and **Last Updated By** information on each page.

Changing Assigned Professionals in MineSpace

Under the **Health, Safety and Reclamation Code** (HSRC) for Mines in British Columbia, there are specific requirements related to notifying the Ministry about changes to key personnel such as the Engineer of Record (EoR) or Tailings Storage Facility (TSF) Qualified Person. Managing your Qualified Professionals should be completed directly in MineSpace.

Updating Details of an Existing Contact

1. Important Note About Contact Card Updates: When you update a contact card for a person, the change will apply to all records associated with that individual.
2. At this time, it is **not possible to update the details of an existing contact card** without entering the person as a new contact, which will trigger a reporting requirement.
3. If you need to update the details of a contact who is already listed as an **active professional**, please reach out to the major mines office at permrecl@gov.bc.ca for assistance.

Ending a Term for your Engineer of Record (EoR)

NOTE: Ending the term of a TSF Qualified Person (TSF QP) will **trigger a request for a report** submission to the Ministry. This can be found on the Reports page for your mine. The due date for the report will be **72 hours** from the day of the provided **End Date**.

1. Navigate to the Tailings Storage Facility record you want to update the contact for.
2. Click **Edit** then click on **Engineer of Record** on the left-hand panel.
3. Click **Manage Engineer of Record (EoR)**, then select **Terminate Current Engineer of Record** to end an existing term for the EoR.
4. Enter the End Date of the term. Providing an **End Date** will trigger a request for a report submission to the Ministry. This can be found on the Reports page for your mine. The due date for the report will be 72 hours from the day of the provided End Date.
5. If a new EoR is replacing the existing contact, refer to above steps to add a new contact.
6. Click **Save & Continue** to save the contact and move to the next page.

Ending a Term for your TSF Qualified Person

1. Navigate to the Tailings Storage Facility record you want to update the contact for.
2. Click **Edit** then click on **Qualified Person** on the left-hand panel.
3. Click **Manage Qualified Person**, then select **Terminate Qualified Person** to end an existing term for the TSF QP.
4. Enter the End Date of the term. Providing an **End Date** will trigger a request for a report submission to the Ministry. This can be found on the Reports page for your mine. The due date for the report will be 72 hours from the day of the provided End Date.
5. If a new TSF QP is replacing the existing contact, refer to above steps to add a new contact.
6. Click **Save & Continue** to save the contact and move to the next page.

Chapter: 12 See who has access to your Mine's Records

1. Go to **User Access**.

- On the left side menu of your mine's page, click **User Access**.
- You will see a list of all BCeID users who can access this mine.

2. What information is shown?

- User name
- BCeID
- Email address
- Last login date and time

3. To add or remove users, follow the steps to add or remove mines from the **My Mines** page, or email <mailto:MDS@gov.bc.ca> for help.

NOTE: Only authorized users should have access to your mine. Check this list regularly.

Figure 25: Click on User Access to see a list of authorized users for your mine.

Chapter 13: Troubleshooting

If you encounter any issues while using MineSpace, refer to this section for troubleshooting tips and solutions to common problems.

Can't log in?

1. Make sure you are using your Business BCeID username and password.
2. If you see "Access Denied," confirm you have requested access to the mine. Contact MDS@gov.bc.ca if you need help.

File won't upload?

1. Check that the file type is accepted and the size is under 750 MB.
2. Refresh the page and try again.
3. If the problem continues, email MDS@gov.bc.ca.

Report options are greyed out?

Some Code Required reports may need to be submitted as Permit Required Reports. Select the permit and section instead.

Need to change a submitted report?

1. Reports cannot be edited in MineSpace after submission.
2. Contact your regional mines office or Major Mines Office for assistance.

Missing reports or deadlines?

1. Check the Upcoming Reports tab.
2. If a required report is not listed, email MDS@gov.bc.ca.

Problems with permits or applications?

For Notice of Work or major mine applications, contact your regional office or Major Mines Office (details are on your mine's Overview page).

General technical issues?

1. Use the in-app help (click the ? icon at the top right of any page).
2. Email MDS@gov.bc.ca for technical support.
